TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python, PHP

Frameworks & Libraries: Spring Boot, React, Express, Laravel, CodeIgniter, FastAPI

Data & Infrastructure: PostgreSQL, MySQL, MongoDB, Redis, Kafka, Docker, Kubernetes, Git

EXPERIENCE

Junior Software Developer-Trainee | Novaware Systems Inc.

Quezon City, Philippines — July 2026 - Present

- Executed scripts to enroll 4,000+ records into the production database for an active project, completing the required data setup to support application operations while assisting with ongoing production support.
- Investigated a reported production issue by reviewing stored procedures, application code, and data configuration; identified missing data bindings as the root cause and helped resolve the issue through configuration updates.

Full-Stack Web Development Intern | Comfac Corporation

Mandaluyong City, Philippines — February 2026 - May 2026

- Implemented 15+ RESTful API endpoints covering the loan lifecycle, including application submission, approval processing, disbursement, and payment schedule generation to support successive stages of the lending workflow.
- Normalized a relational database schema spanning 10 related tables, organizing loan data and enforcing referential integrity to maintain consistent relationships across application, approval, disbursement, and payment workflows.

Software Developer | Freelance

Remote — January 2026

- Built a client-facing lending frontend with REST API integration and form validation, connecting application forms to backend services and checking user inputs before submitting loan requests.

PROJECTS

JenVentory - Point-of-Sale and Inventory System

Spring Boot, React, TypeScript, PostgreSQL

- Built a point-of-sale and inventory system for a sari-sari store, replacing paper-based recordkeeping with centralized digital workflows for recording daily sales, managing inventory, and maintaining organized transaction records.
- Implemented customer debt tracking to record outstanding balances alongside sales transactions, consolidating customer debt records in one system so the store could review unpaid purchases without searching through handwritten entries.

Pamantasan ng Lungsod ng Pasig Document Management System

Laravel, React, Inertia.js, TypeScript, Python, Flask

- Led development and deployment of a Laravel and React document management system, coordinating submission routing, multi-stage workflows, and document version management to support processing from initial submission through approval.
- Automated signature consistency checks by integrating a convolutional neural network (CNN) through a Python/Flask API, connecting model-based signature analysis to the document approval workflow to support signature review.

EDUCATION

Pamantasan ng Lungsod ng Pasig

Bachelor of Science in Information Technology — September 2023 - June 2026

- President's & Dean's List Academic Achievement Awardee

Jose Rizal University

Bachelor of Science in Information Technology — August 2022 - May 2023
