EDUCATION

Pamantasan ng Lungsod ng Pasig

Bachelor of Science in Information Technology

Pasig City

2023 - 2026

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Integrative Programming, Database Systems, Discrete Mathematics, Security & Assurance, Software Engineering, System Integration and Architecture

Awards:

- Dean's List Academic Achievement Awardee

Jose Rizal University

Bachelor of Science in Information Technology

Mandaluyong City

2022 - 2023

EXPERIENCE

Junior Software Developer-Trainee, Novaware Systems Inc. – Quezon City

July 2026 - Present

CodeIgniter, PHP, JavaScript

- Undergoing structured technical training to assist in building, testing, and maintaining full-stack web applications using PHP and CodeIgniter according to team development standards.

Full-Stack Web Development Intern, Comfac Corporation – Mandaluyong City

February - May 2026

Laravel, Next.js, TypeScript, Zod,

- Engineered 15+ RESTful API endpoints covering the full loan lifecycle from submission, approval, disbursement, and payment schedule generation.
- Normalized a multi-stage loan workflow database schema, eliminating redundant data relationships and enforcing referential integrity across related tables.

Software Developer, Freelance Contract (Remote)

January 2026

React, TypeScript, TanStack (Query, Router, Form), Zod

- Resolved backend API integration issues while building the frontend for a lending system, implementing end-to-end form validation.

PROJECTS

Pamantasan ng Lungsod ng Pasig Document Management System

github.com/qmsopticore

Laravel, React, TypeScript Inertia.js, Python, Typescript, Flask

- Led end-to-end development and deployment of a document management system, streamlining document submission routing, multi-stage approvals, and version control.
- Integrated a Flask API serving a CNN model for signature consistency checks into the document approval workflow.

JenVentory

github.com/jenventory

Spring Boot, React, TypeScript, TanStack (Query, Form, Router), Zod, PostgreSQL

- Replaced a manual pen-and-paper tracking system by building a full-stack POS, inventory, and per-customer debt management system.
- Designed RESTful APIs managing products and debtor records, secured with JWT authentication.

SKILLS

Languages: JavaScript, TypeScript, Java, PHP

Databases: MySQL, PostgreSQL

Frameworks: Laravel, Spring Boot, CodeIgniter, Express, Tailwind CSS, Bootstrap

Libraries: React, Zod, Lombok, TanStack, Axios, Inertia.js, Sanctum

Developer Tools & Platforms: Git, GitHub, Docker, Figma
